

The diagram illustrates the structure of a SOAP message using three nested rounded rectangles. The outermost rectangle is labeled 'Envelope'. Inside it, at the top, is a smaller rectangle labeled 'Header (0...*)'. Below the header is a larger rectangle labeled 'Body'. Inside the 'Body' rectangle is the innermost rectangle, labeled 'XML Content or Fault'. All rectangles have a light blue fill and a dark blue border.

Envelope

Header (0...*)

Body

XML Content or Fault
